Docket No. 50-483

Union Electric Company
ATTN: Mr. Donald F. Schnell
Vice President - Nuclear
Post Office Box 149 - Mail Code 400
St. Louis, MO 63166

Gentlemen:

This is to acknowledge receipt of your letters of December 28, 1984 and January 29, 1985, which transmitted changes to the Callaway Plant Radiological Emergency Response Plan, Revision 8 and proposed 8A, respectively. Proposed Revision 8A was developed based on a review of Revision 8 which was discussed with Mr. M. Stiller of your staff on January 23, 1985.

We have completed our review of the submitted changes and have determined that with revisions 8 and 8A your Callaway Plant Radiological Emergency Response Plan continues to meet the planning standards of 10 CFR 50.47(b) and the requirements of 10 CFR Part 50, Appendix E. Based on our review we have concluded that the two revisions taken together meet the requirements of 10 CFR 50.54(q) and do not decrease the effectiveness of the plan.

Be advised that 10 CFR 50.54(q) also requires prior NRC approval of any changes to your plan which may decrease the effectiveness of the plan. However, if your safety review assures no decrease in emergency preparedness effectiveness, then changes to the plan may be made and implemented without prior NRC approval. In all cases, you must furnish copies of each proposed change to the NRC in accordance with 10 CFR 50.54(q). Since Revisor 8A is to be implemented on February 1, 1985, you should provide copies of this revision to the NRC by March 3, 1985. Also, any changes to the Emergency Plan Implementing Procedures should be made in accordance with the requirements of 10 CFR Part 50, Appendix E, Section V.

Glen Ellyn, IL 60137

ULNRC-1005

Dear Mr. Keppler:

DOCKET NO. 50-483
CALLAWAY PLANT UNIT 1
FACILITY OPERATING LICENSE NPF-30
CALLAWAY PLANT RADIOLOGICAL EMERGENCY RESPONSE PLAN, REV. 8A

Reference: ULNRC-751 dated March 1, 1984

Enclosed please find three (3) copies of Revision 8A to the Callaway Plant Radiological Emergency Response Plan (RERP) and a description of all changes made from Revision 7.

Revision 8A includes changes which address comments received from the NRC during the Emergency Preparedness Appraisal visit and their observation of our Annual Field Exercise. Other changes reflect recent company organizational changes, mode applicability for EAL's, and editorial corrections.

It is our opinion that Revision 8A does not decrease the effectiveness of emergency preparedness at Callaway and that the plan continues to meet the standards of 10CFR50.47(b) and the requirements of 10CFR50, Appendix E. Revision 8A of the Callaway Plant RERP is hereby submitted for your review. Per 10CFR50.54(q), we intend to implement this revision on January 31, 1985 unless we receive comments from you which would necessitate additional changes.

Very truly yours,

Donald F. Schnell
