

OCT 2 2 1975

D. L. Caphton, Senior Reactor Inspector, Reactor Operations Branch

OYSTER CREEK (DN 50-219)
REGION I INSPECTION 75-23

This was a routine inspection to complete the required Review and Audit module, and was conducted at the corporate level. I am of the view that Module No. 40700B should require corporate inspection effort. No requirement at Oyster Creek exists to furnish copies of offsite committee procedures for conduct of meetings and audits and it appears appropriate to me to audit the offsite committee function at their normal place of business, which is at the corporate level.

E. G. Greenman
Reactor Inspector
