

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-416 2.206

MISSISSIPPI POWER AND LIGHT COMPANY

MIDDLE SOUTH ENERGY, INC.

SOUTH MISSISSIPPI ELECTRIC POWER ASSOCIATION

GRAND GULF NUCLEAR STATION, UNIT 1

ISSUANCE OF DIRECTOR'S DECISION UNDER 10 CFR 2.206

'84 SEP -4 P4:03

OFFICE OF SECRETARY OF LICENSING & SERVICE BRANCH

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation has denied the Petition filed under 10 CFR 2.206 by the Jacksonians United for Livable Energy Policies regarding the Grand Gulf Nuclear Station, Unit 1 (the facility).

The Petitioner requested that the Nuclear Regulatory Commission issue an order to Mississippi Power and Light Company to show cause why the license for the facility should not be revoked and a stay of operation should not be issued. The Petitioner also requested that the operating license be modified to remove responsible management personnel and ensure implementation and verification of corrective actions associated with technical specification discrepancies. The Commission has taken actions to resolve these problems and Grand Gulf has taken corrective actions for the identified problems. Because appropriate corrective measures have been initiated, institution of further proceedings to implement these actions is unnecessary.

The reasons for the above conclusions are fully described in a "Director's Decision Under 10 CFR 2.206," dated **AUG 31 1984** which is available for public inspection in the Commission's Public Document Room located at 1717 H Street, N.W., Washington, D. C. 20555, and the Hinds Jr. College, George M. McLendon Library, Raymond, Mississippi 39154.
