

Docket Nos.: 50-440  
and 50-441

FEB 19 1985

Ms. Susan L. Hiatt  
OCRE Representative  
8275 Munson Road  
Mentor, Ohio 44060

Dear Ms. Hiatt:

Thank you for your February 7, 1985 letter identifying what appeared to you to be a discrepancy between the Perry FSAR commitments and the Perry draft Technical Specification assumptions relative to the Standby Liquid Control System operation. Your letter has been referred to the Technical Specification Review Group staff who are developing the Technical Specifications for Perry, Unit 1 licensing. Please be advised that we are in the early stages of finalizing the Technical Specifications for Perry, Unit 1. A second draft is scheduled to be submitted to the applicant in March 1985; the "proof and review" copy is scheduled in April 1985; and we expect to submit the final draft just prior to Unit 1 licensing (currently targeted for June/July 1985). This process was developed to ensure that the final Technical Specifications will be consistent with the Commission's regulations, the FSAR commitments, and the staff findings, positions, etc., documented in the Perry SER and SER supplements.

You also indicated that your copy of the draft Technical Specifications submitted by NRC letter dated January 30, 1985 is missing Pages 3/4 6-38 through 3/4 7-20. These pages are enclosed.

Sincerely,

**ORIGINAL SIGNED BY:**

John J. Stefano, Project Manager  
Licensing Branch No. 1  
Division of Licensing

Enclosure: As stated
