*Docket
No. 50-424/425*

Docket Nos: 50-424
50-425

Mr. Donald O. Foster
Vice President and General Manager
Georgia Power Company
Rt. 2, Box 299A
Waynesboro, GA 30830

Dear Mr. Foster:

Subject: Information on Vogtle Technical Specifications

The enclosure contains the NRC review schedule for plant Technical Specifications. The review will begin 56 weeks prior to fuel load. You should use this information in scheduling your Technical Specification development.

Concerning changes to the standard Technical Specifications, you should note that the staff will only accept (1) departures from the standard due to unique design features or unique organizational characteristics, or (2) changes that represent a significant improvement over the standard which should be included in the next revision to the standard and do not represent a change in generic requirements. Departures from the standard which do represent a change in generic requirements must be reviewed by the NRC Committee to Review Generic Requirements (CRGR) before they can be accepted for the Vogtle technical specifications.

If there are any questions on the above, contact the project manager, Melanie Miller at (301) 492-4259.

Sincerely,

Elinor G. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
Office of Nuclear Reactor Regulation
