Dear Mr. McNeill:

SUBJECT: GENERIC LETTER NO. 84-23-JAMES A. FITZPATRICK NUCLEAR POWER PLANT

Generic Letter No. 84-23, "Reactor Vessel Water Level Instrumentation in BWRs", requested that you provide a description of your plans to implement several categories of improvements in reactor water level instrumentation. Your response dated December 13, 1984 stated that you plan to integrate the first category of improvements into your Reg. Guide 1.97 schedule. In accordance with this schedule, these modifications would be completed by December 31, 1986 or 30 days after the end of the 1986 refueling outage, whichever is later. You also stated that modifications related to the second category of improvements would be completed by the end of your upcoming refueling outage, scheduled to begin in February 1985.

On the basis of these commitments, we find your response acceptable.

Sincerely,
