OYSTER CREEK 8 X 8 FUEL

Enclosed is the memo discussed in the telecon with Ferd Dreher on April 18. As stated we are told by RL that the analysis on ECCS and for the 8 x 8 fuel must both be completed, implementing authorization provided by RL before the licensee can initiate low power physics tests or shutdown margin tests. The licensee currently expects to complete refueling and requires this authorization by May 2, 1975.

Eldon J. Brunner, Chief
Reactor Operations Branch
