Mr. Paul R. Nelson, Chief
Fuel Facility and Materials Safety Branch
United States Nuclear Regulatory Commission
Region 1
631 Park Avenue
King of Prussia, Pennsylvania 19406

Dear Mr. Nelson:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Inspection No. 75-25

In their inspection of the Oyster Creek Nuclear Generating Station on November 12 and 13, 1975, Messrs. Ruhlman and Stohr identified the failure to review, revise and approve annually (or more frequently, if required) the Oyster Creek Emergency Plan as a deficiency. By November 24, 1975, a committee had been formed and had met to review the Emergency Plans and Procedures. To avoid further non-compliance in this area, a list specifying dates for required reviews and drills will be established by the end of January, 1976.

If you have further questions, please contact me.

Very truly yours,

Donald A. Ross, Manager
Generating Stations-Nuclear
