Mr. Robert D. Martin, Regional Administrator
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection and Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Dear Mr. Martin:

River Bend Station Unit 1
Docket No. 50-458

On July 18, 1984 Gulf States Utilities (GSU) submitted an initial response to I&E Bulletin 84-02 "Failures of General Electric Type HFA Relays Used in Class 1E Safety Systems". At that time it was indicated that the upgrading of all class 1E HFA relays containing Lexan or nylon bobbins to Century Series (Tefzel) coils was approximately 90 percent complete. There are currently four (4) relays left requiring changeout. It is anticipated that this upgrading will be complete by late January, 1985.

Additional information addressing inadvertant use of problematic parts will be provided in an interim or final status report by February 1, 1985.

Sincerely,

J. E. Booker
Manager-Engineering,
Nuclear Fuels & Licensing
River Bend Nuclear Group
