JUL 2 4 1975

Paul R. Delson, Chief Radiological and Environmental Protection Eranch, IE:I

OYSTER CREEK ENVIROREDATAL TECHNICAL SPECIFICATIONS (F18060H2)
REF: Your request for action F18060H2 which enclosed inspection report 50-219/75-08

We have followed Licensing's schedule and work on issuance of ETS in conjunction with conversion of Oyster Creek to a full-term operating license. Licensing's schedule and work has suffered continual secbacks and delays because of the many complicated environmental issues involved.

In a recent discussion, Mr. R. Bevan, the Environmental Project Manager, assured me that the licensee will submit a set of proposed technical specifications within the next two weeks. When received, we will forward a copy of the tech specs for your review and, at that time, you may submit your detailed comments.

On the basis of this information and our expectation of receiving copies of draft revisions to the technical specifications, I am closing out action item F18060H2.

The adequacy of environmental monitoring programs is a generic concern to Reactor Licensing as well as to us. While the programs are not subject of scheduled reviews they are considered on an individual facility basis and your inspection reports are forwarded to Licensing as an aid in their review. In our discussions with Licensing, we understand that environmental monitoring programs for operating plants will be considered in the implementation of Appendix I of Part 50. The schedule for implementing Appendix I was the subject of a July 21, 1975 memorandum from Pr. Carl Kuhlman to Regional Directors.

Leo B. Higginbothom, Acting Chilf Radiological and Invironmental Pretection Branch Office of Inspection and Enloyed
