

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER  
VICE PRESIDENT - NUCLEAR

February 18, 1985

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

KMLNRC 85-059  
Re: Docket No. STN 50-482  
Ref: Letter KMLNRC 85-046, dated 3/30/85  
from G.L. Koester, KG&E, to H.R. Denton, NRC  
Subj: Integrity of System Outside Containment  
Likely to Contain Radioactive Material

Dear Mr. Denton:

The referenced letter provided Kansas Gas and Electric Company's program to reduce leakage from those portions of systems outside containment that could contain highly radioactive fluids during a serious transient or accident. The reference stated that the periodic visual inspection would be performed prior to initial fuel load and once between each refueling. This letter is submitted to report that the initial inspection has been completed. The results of the inspection will be made available to NRC I&E personnel at the Wolf Creek site.

Yours very truly,

*Glenn L. Koester*  
Glenn L. Koester  
Vice President - Nuclear
