General  Public Utilities Corporation

July 15, 1975

Mr. George Lear, Chief  
Operating Reactors Branch #3  
Division of Reactor Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Lear:

SUBJECT: OYSTER CREEK NUCLEAR GENERATING STATION  
DOCKET NUMBER 50-219  
COMPLIANCE WITH LICENSE AMENDMENT NO. 8  
LICENSING CONDITIONS (REVISION NO. 1)

Our letter dated June 24, 1975 was in response to license conditions 2.D.1 and 2.D.2 of Amendment No. 8 to the Oyster Creek Provisional Operating License. We indicated that modifications to overcome the majority of failures identified in Attachment I of our letter were incorporated as part of the proposed modification which was included as Attachment II.

The purpose of this revision of Attachment II to our June 24, 1975 letter is to describe our proposed modifications to accommodate the remaining single failures. When this revised version of Attachment II is incorporated into our June 24, 1975 letter, we will have proposed modifications to correct all of the unacceptable single failures which could affect ECCS performance.

Very truly yours,

  
Iven R. Finfrock, Jr.  
Vice President
