UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

March 6, 1975

Robert M. Lazo, Esq.
Chairman, Atomic Safety and
Licensing Board
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

In the Matter of
Jersey Central Power & Light Company
Oyster Creek Nuclear Generating Station
Docket No. 50-219

Dear Mr. Lazo:

This letter is intended to serve as a status report with respect to ongoing negotiations among the parties to the above-captioned proceeding. The parties are attempting to resolve those matters which have arisen either from Intervenor's Petition for Leave to Intervene or from the NRC Staff's Final Environmental Statement related to the Oyster Creek Nuclear Generating Station.

I am pleased to inform you that an accommodation has been reached between the Jersey Central Power & Light Company and the Intervenor which resolves those matters raised by the latter's Petition for Leave to Intervene. Details of the agreement are being finalized. As a result of this accommodation, it is Intervenor's intention to file, at an appropriate date in the future, a motion to withdraw from the proceeding.

In light of the accommodation and attempt to reconcile the interests of all the parties, discussions are continuing in order to clarify the license conditions involving related matters raised in the Staff's Final Environmental Statement. The Staff anticipates that these clarifications will be reached fairly soon. We will be prepared to present the results to the Licensing Board at a conference called for that purpose.

Sincerely,

Myron S. Kaufman

Myron S. Kaufman
Counsel for NRC Staff
