Mr. M. D. Spence
President
Texas Utilities Generating Company
400 N. Olive Street
L. B. 81
Dallas, Texas 75201

Dear Mr. Spence:

Subject: Technical Specification to Implement Secondary Water Chemistry
Monitoring and Control Program for Comanche Peak Steam Electric
Station (Unit 1)

In Section 5.4.2.3 of the Comanche Peak SER Supplement No. 1, the NRC staff stated that the operating license for Unit 1 should be conditioned to require TUGCO's proposed secondary water chemistry monitoring and control program to be carried out. TUGCO letter dated August 24, 1984, submitted a Technical Specification which contains a requirement to implement the secondary water chemistry monitoring and control program, conforming with the guidelines of the Standard Review Plan, Section 5.4.2.3. The staff considers this Technical Specification acceptable, and as such the applicable license condition discussed in SER Supplement No. 1 is no longer required. This license condition will accordingly be deleted in a future SER supplement.

Sincerely,

ORIGINAL SIGNED BY:

B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing
