OYSTER CREEK DISPOSAL OF LPRM "FISSION DETECTORS" - U-235

R. Swift, at Oyster Creek, called me at 1:00 p.m., on June 20, 1975, with respect to our conversation concerning disposal of LPRM Fission Detectors containing approximately 10 milligrams of U-235 per detector. Swift informed me that Jersey Central Power and Light Company was involved in contract preparation for disposal of same. I referenced our earlier conversation and told Mr. Swift that you would contact him in this regard. Please apprise projects of the outcome of this matter.
