Dear Mr. Schwencer:

Attached is a copy of the Limerick Control Room Design Review (CRDR) Final Report, Supplement 1. As discussed in the reference 1 letter, this supplemental report documents the completion of the final validation step of the Limerick CRDR Program Plan, and its submittal satisfies the commitment made in the reference 2 letter.

Submittal of this supplemental report also constitutes partial satisfaction of item 2 of Attachment 4 to Facility Operating License NPF-27, Limerick Generating Station Unit 1. This item will be completely satisfied when all Priority 1 human engineering discrepancies (HED's) have been corrected. The reference 2 letter discussed two Priority 1 HED's: HED A1-13 "Annunciator Silence Button" and HED SI4-04 "Testability of Remote Shutdown Panel Indicating Status Lights." HED A1-13 was corrected prior to fuel load. As required by the license, correction of HED SI4-04 will be completed prior to operation of the plant at a power level greater than five percent of rated power. We will inform you of its completion by letter.
