Mr. Karl R. Goller
Assistant Director for Operating Reactors
Division of Reactor Licensing
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Goller:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Request for Extension for Appendix J Comparison

Your letter of August 7, 1975 requested that we determine if containment leakage testing is being conducted in full compliance with Appendix J of 10 CFR Part 50 at the Oyster Creek Nuclear Generating Station. A detailed comparison in response to this request is being prepared, but it is not yet complete. We expect it will be completed by mid-November, 1975, and we, therefore, request that this additional time be permitted for a thorough examination and comparison. Please note that some information on containment leakage testing at the Oyster Creek Station was provided to you in response to Question 8 of Addendum 1 to Supplement 6 to Amendment 68 to the Oyster Creek Facility Description and Safety Analysis Report (Addendum 1 is dated November 21, 1973).

Thank you for your cooperation in this matter.

Very truly yours,

Ivan R. Finfrock, Jr.
Ivan R. Finfrock, Jr.
Vice President
