Docket Nos. 50-338  
50-339  
License Nos. NPF-4  
NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY  
NORTH ANNA POWER STATION UNIT NOS. 1 AND 2  
PROPOSED TECHNICAL SPECIFICATION CHANGES

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requests an amendment, in the form of changes to the Technical Specifications, to Operating Licenses NPF-4 and NPF-7 for North Anna Unit Nos. 1 and 2.

The proposed Technical Specification changes reflect the current organizations within the Nuclear Operations Department, Quality Assurance Department, Maintenance and Performance Services Department and Security Department. In addition, the changes reflect 1) the title change of the Executive Vice President - Power to the Executive Vice President and Chief Operating Officer, 2) the requirement to retain the records for at least five years when the Station Emergency Plan and implementing procedures and the Station Security Plan and implementing procedures are annually audited, and 3) the reference change of the ANSI standard on Facility Staff Qualification and Training.

In order to meet the requirements of ANS 3.1-(12/79 Draft) we are planning a "phased" verification of the specific qualification requirements of the standard. The task analysis required by paragraph 5.3.1 of ANS 3.1-(12/79 Draft) will be performed. Individual background and experience will be considered to assure that the intent of the standard is met.

From an organizational point of view, the proposed changes will provide assurance that the plant is operated safely and all issues which have potential for impacting the continued safe operation of the plant will be reviewed by the individuals best qualified to render judgment and advise the Station Manager.

The proposed Technical Specification changes for North Anna Unit No. 1 are provided in Attachment 1. The proposed Technical Specification changes for North Anna Unit No. 2 are provided in Attachment 2. A discussion of the proposed Technical Specification changes is provided in Attachment 3.

Rec'd w/Check #150.00

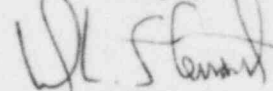

Acc 1  
/11

This request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control staff. It has been determined that this request does not pose an unreviewed safety question as defined in 10 CFR 50.59 and does not pose a significant hazards consideration as defined in 10 CFR 50.92.

We have reviewed this request in accordance with the criteria in 10 CFR 170.12. A check in the amount of \$150 is enclosed as an application fee.

These proposed Technical Specification changes supercede our previous reorganization Technical Specification changes. Please cancel our proposed Technical Specification change requests dated June 24, 1982 (Serial No. 264), July 1, 1983 (Serial No. 264A) and October 13, 1983 (Serial No. 264B).

Very truly yours,

W. L. Stewart
