License No. DPR-16
 Inspection No. 75-15
 Docket No. 50-219

Gentlemen:

This refers to the inspection conducted by Mr. Jernigan of this office on May 21-22, 1975 at Oyster Creek Nuclear Station of activities authorized by NRC License No. DPR-16 and to the discussions of our findings held by Mr. Jernigan with Mr. J. Carroll of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the Office of Inspection and Enforcement Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no items of noncompliance were observed.

In accordance with Section 2.790 of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room. If this report contains any information that you (or your contractor) believe to be proprietary, it is necessary that you make a written application within 20 days to this office to withhold such information from public disclosure. Any such application must include a full statement of the reasons on the basis of which it is claimed that the information is proprietary, and should be prepared so that proprietary information identified in the application is contained in a separate part of the document. If we do not hear from you in this regard within the specified period, the report will be placed in the Public Document Room.

Docket No. 50-219

LICENSEE: JERSEY CENTRAL POWER & LIGHT COMPANY (JCP&L)

FACILITY: OYSTER CREEK NUCLEAR GENERATING STATION

SUMMARY OF MEETING HELD ON MAY 20, 1975 TO DISCUSS JCP&L'S CRITICAL POWER CORRELATION

On May 20, 1975, a meeting was held with representatives of Jersey Central Power & Light Company to resolve the differences between the critical heat flux values calculated by us and those calculated by General Public Utilities Service Corporation (GPUSC) using the XN-2 correlation as described in Appendix B to JCP&L's letter dated May 14, 1975. A list of attendees is enclosed.

A comparison of calculations led to identifying the discrepancy as being an incorrect equation in Appendix B to JCP&L's letter of May 14, 1975. GPUSC had nonetheless used the correct form of the equation in their computer program. At the conclusion of the meeting, we accepted GPUSC's calculational results, subject to NRC verifying the source of the discrepancy. Further discussions will be held regarding the acceptable minimum critical power ratio for Cycle 5.
