RE: License Renewal Application_MC616874

Leak Tests:

Leak Tests will be performed at the intervals approved by the NRC or an Agreement State and specified in the SSD registration certificate. Leak tests will be analyzed by an organization authorized by the NRC or an Agreement State to provide leak testing services to other licensees. Leak tests may be collected by the licensee, using the sealed source or plated foil manufacturer's (distributor's) and the leak test kit supplier's instructions. Such leak test kits will be supplied by an organization authorized by the NRC or an Agreement State to provide leak testing services.

Material Receipt and Accountability:

We will develop, implement, and maintain procedures for ensuring accountability of licensed materials at all times. Physical inventories will be conducted at intervals not to exceed 6 months, to account for all sealed sources and devices received and possessed under the license. Records of inventory will be maintained for a period of 5 years from the date of each inventory, and will include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

Occupational Dose:

We will maintain, for inspection by the NRC, documentation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in 10 CFR 20.1502.

Sincerely,

Jason Yager

Hi Carol,

CSC released these two documents below, they include a digital signature. Its embedded in the e-mail.

Is there a way to put these into ADAMS, same ML ??
These are Publicly Available.

Quantel-USA License Renewal # 25-27639-01
MC # 616874
RFI Response dated April 15, 2020

Thanks so much
