JERSEY CENTRAL RESPONSE TO INFORMATION REQUEST 74-1, CDR 281, DM 50-219  
(AICF #H00049F1)

As discussed yesterday, the subject action item was the licensee's response to Regulatory Operations Information Request 74-1 on "Abnormal Occurrences in Piping Systems" and should not have been logged in as a Construction Deficiency Report. Nevertheless, the data supplied by the licensee was forwarded to the Division of Technical Review, DRL. The information was included in DRL's Evaluation Report forwarded to B. H. Grier by R. R. Maccary on March 24, 1975.

Therefore, the subject action item is considered to be closed.

Robert T. Carlson, Chief  
FC&ES Branch
