

March 28, 1984

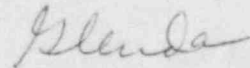

NOTE TO: Bill Adam, Region III

FROM: Glenda Jackson, License Fee Management Branch, ADM

As we discussed today, Radiation Safety Service, Inc. has not responded to my letters of September 22, 1983 and December 21, 1983 for additional fees to cover the special nuclear material, source material, and service activities requested in the August 22, 1983 application for a license. The \$190 (3K) fee has been paid for ~~for~~ portion of the application dealing with evaluation of samples. Therefore, only the evaluation portion of the application should be acted on. The remainder of the application should be considered as being abandoned for non-payment of fees.

If a cover letter is done explaining this, please call me for concurrence on the fee portion.

If the entire application is voided due to lack of response to your deficiency letter, please call me. Thanks.

Glenda

SUMMARY

Glenda called to inform me that she had abandoned this application for non-payment of fees. Only the R+D fee had been paid, leaving the Source, SNM, and Service portions of the required fee unpaid. She said it would be allowable to write the R+D portion of the license (if the response comes in) and issue with a cover letter stating that the other portions were not included on the license because of nonpayment of fees.

ACTION REQUIRED

If response comes in, I will issue license as stated above. (with Glenda.)
