2. Letter from OPPD (T. L. Patterson) to NRC (Document Control Desk) dated October 27, 1995 (LIC-95-0208)

Subject: Transmittal of Fort Calhoun Station Core Operating Limit Report (COLR) - Revision 9

In accordance with Fort Calhoun Station (FCS) Technical Specification 5.9.5, the Omaha Public Power District (OPPD) is transmitting the attached revision to the FCS COLR. Reference 2 provided Revision 9 of the COLR which added text and a figure associated with Axial Power Distribution. Figure 8, "Axial Power Distribution LSSS for 4 Pump Operation," was subsequently revised to correct a typographical error in the top of the drawing. This error was corrected as a documentable error change and no revisions were made to the remainder of the procedure. Therefore, OPPD is resubmitting Revision 9 to the COLR with the corrected drawing.

If you should have any questions, please contact me.

Sincerely,

T. L. Patterson
Division Manager
Nuclear Operations
