RE: Perry Nuclear Power Plant Docket Nos. 50-440; 50-441 Restart of the Control Complex Chiller [RDC 70(83)]

Dear Mr. Keppler:

Mr. James G. Keppler

799 Roosevelt Road

In our last letter dated June 7, 1984, regarding restart of the Control Room Chiller following a Loss of Offsite Power or a Loss of Coolant Accident, we stated that implementation of the required design modifications was anticipated to be complete by November 1, 1984. However, it has recently been identified that a revision is required for Engineering Change Notice 15384-086-248, which was issued to document the necessary modifications. Since the required revision affects restart of the Control Room Chiller, we now anticipate implementation of this modification by December 28, 1984.

Please call if there are any questions.
