## In S-F district

# Evacuation plan going nowhere

By E.J. BROWN  
Staff Writer

ROYERSFORD — Despite low-power testing at the Limerick nuclear generating station being on the horizon, the Spring-Ford School Board is refusing to go to work on a district evacuation plan, since it feels it may be impossible to complete.

"We have not taken any steps to organize a committee," Superintendent Dr. William A. Welliver told a parent who questioned the status of the plan at the board meeting Monday night. He added that as far as he knows, only one school district actually has a plan at this point, and mentioned the frustration that has plagued the development of a plan in the Owen J. Roberts School District. Roberts was hampered by Chester County's inability to provide enough buses and drivers to support the evacuation.

School board members seemed to be of the same mind, and would not commit themselves to the formulation of such a plan in the near future.

Karen Kreider, of Mason Street in Royersford, who has been monitoring the progress of the district's response to nuclear emergency preparedness, was annoyed that nothing was being done.

"When my children are in school, I'm at work in Philadelphia," she said. "If there's an emergency, I can't leave and come back. You are responsible. I submitted my name in

May to be on a parent committee, and so far nothing has happened...I don't think we can just put this thing in mothballs and refuse to deal with it."

Welliver responded, "We would welcome a group that would like to develop a plan that is reasonable."

He said that he expected the district to have a plan by the time Limerick goes to full-power next spring. When asked when the process would begin, board President Dr. Bruce L. Burns told Kreider, "You will hear from us in the future."

The school district is protesting the use of its name on a preliminary draft plan made up by a consultant for Philadelphia Electric Co., that has been submitted to the Pennsylvania Emergency Management Agency as the district's plan. Welliver recently wrote a letter to both state and federal emergency management offices saying the plan in their hands was not from the district, and asking that it not be distributed to other agencies as such.

Federal officials assured him that

nothing in their hands was being considered as a final draft, and that copies of the consultant's plan would not be given out.

In a letter dated Oct. 10, however, John L. Patton, director of PEMA, told Welliver that his agency "understood" that the draft had been given to them through the Montgomery County Office of Emergency Preparedness "with the district's knowledge."

Last April, Robert Bradshaw, of Energy Consultants, a Harrisburg area company working for PE, said that he had already met with Welliver, although not with the school board, to discuss ideas for the plan. Patton said that PEMA has already been involved with reviewing the ongoing drafts of the Spring-Ford plan since last October. The agency has released copies of it to a "service list" designated by the NRC's licensing board.

When asked why the board was refusing to work on the plan, Burns shrugged, "No one has ever come to us and said we have to do it."

He said, however, that the board's lack of action is not an attempt to keep the Limerick facility from obtaining its license to operate.
