

APPENDIX A  
NOTICE OF VIOLATION

Louisiana Power & Light Company  
Waterford Steam Electric Station, Unit 3

Docket: 50-382/84-38

Permit: CPPR-103  
License: SNM-1913

Based on the results of an NRC inspection conducted during the period of August 20-24, 1984, and in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C), 49 FR 8583, dated March 8, 1984, the following violation was identified:

Failure to Post Form NRC-3, "Notices to Employees"

10 CFR Parts 19.11(c) and (d) and 50.7(e) require that each licensee, permittee, and applicant shall post Form NRC-3, "Notice to Employees," on its premises. Posting must be at locations sufficient to permit employees protected by this section to observe a copy on the way to or from their place of work.

Contrary to the above, the licensee had not posted Form NRC-3 so that workers could observe a copy on the way to or from their place of work. Specifically, Form NRC-3 was not readily observable near avenues of ingress and egress to and from the control room and the offices of chemistry and health physics within the reactor power block.

This is a Severity Level V Violation. (Supplement II) (382/8438-01)

Pursuant to the provisions of 10 CFR 2.201, Louisiana Power & Light Company is hereby required to submit to this office, within 30 days of the date of this Notice, a written statement or explanation in reply, including: (1) the corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.

Dated: OCT 17 1984
