Joseph M. Farley Nuclear Plant (FNP)
Revision 30 to the FNP Security Plan

Ladies and Gentlemen:

In accordance with 10 CFR 50.54(p), Southern Nuclear Operating Company submits Revision 30 to the FNP Security Plan. In accordance with 10 CFR 50.4(b)(4), the signed original and three copies are being sent to the Document Control Desk, and two copies are being sent to the appropriate Regional Office.

Southern Nuclear has reviewed Revision 30 to the FNP Security Plan concerning the addition of a vehicle barrier system (VBS), and has determined that the revision does not decrease the safeguards effectiveness of the FNP Security Plan. Previously submitted Revision 27A concerning containment access control has also been incorporated into Revision 30. Pages changed by incorporating Revision 27A will not have revision bars on the pages, but will be identified as Revision 30 pages. Revision 28 concerning a biometrics access control system will not be issued until the biometrics access control system has been implemented. (The biometrics revision to the FNP Security Plan will not be number 28, but will be numbered sequentially with the appropriate FNP Security Plan revision at that time.)

Please note that the information contained in Attachment 1 is safeguards information, and should be withheld from public disclosure in accordance with 10 CFR 73.21.

If there are any questions, please advise.

Respectfully submitted,
