Docket No. 50-334

Mr. J. J. Carey, Vice President  
Nuclear Division  
Duquesne Light Company  
Post Office Box 4  
Shippingport, PA 15077

Dear Mr. Carey:

The Commission has issued the enclosed Amendment No. 80 to Facility Operating License No. DPR-66 for the Beaver Valley Power Station, Unit No. 1. The amendment consists of changes to the Technical Specifications in response to your application dated May 21, 1984.

The amendment changes the Technical Specifications for Beaver Valley Unit No. 1 to require either the sump discharge flow measurement system or the sump level instrument be operable during plant operation. Prior to this amendment, the specifications allowed no choices but simply required that the former be operable. The amendment also corrects a number of administrative errors in the Technical Specifications. Other changes requested in the same letter will be addressed by future actions.

A copy of the related Safety Evaluation is enclosed. The Notice of Issuance will be included in the Commission's next regular monthly Federal Register notice.

Sincerely,

A handwritten signature in cursive script that reads "Peter S. Tam".
