Docket No. 50-346

Mr. Richard P. Crouse
Vice President - Nuclear
Toledo Edison Company
Edison Plaza - Stop 712
300 Madison Avenue
Toledo, Ohio 43652

Dear Mr. Crouse:

SUBJECT: CONTROL OF HEAVY LOADS NEAR SPENT FUEL - PHASE I

The staff has completed its review of the Control of Heavy Loads Near Spent Fuel - Phase I for the Davis-Besse Nuclear Power Station, Unit No. 1. Our review was based upon your response to our December 22, 1980, generic letter on Control of Heavy Loads and supplemental information provided by you. Based on our review and that of our consultant, Franklin Research Center, we conclude that the guidelines of NUREG-0612, Sections 5.1.1 and 5.3 have been satisfied. Phase I of this issue, therefore, is considered to be resolved acceptably.

Our Safety Evaluation and Franklin Research Center's Technical Evaluation Report are enclosed. Phase II of this issue will be the subject of future correspondence.

Sincerely,

John F. Stolz, Chief
Operating Reactors Branch No. 4
Division of Licensing
