SLNRC 85-9 FILE: 0278
SUBJ: Justifications for Interim
Operation - Seismic Qualification

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Docket No: STN 50-482

Reference: SLNRC 84-0102, dated 7/16/84: Same Subject

Dear Mr. Denton:

The reference letter provided commitments to perform specific actions related to seismic qualification of equipment prior to exceeding 5% of rated full power at Wolf Creek Generating Station, Unit No. 1. These actions have been completed. Specifically, Field Change Notice FCN-SAPM-10627, related to the Justification for Interim Operation (JIO) for the Thermocouple/Core Cooling Monitor System has been completed. Also, the revised setpoints required for qualification of flow switches per JIO ESE-40A have been implemented at Wolf Creek. (Note that the NSSS qualification program designation for these flow switches has been changed from ESE-40 to ESE-40A).

Very truly yours,

J. A. Cermak for
Nicholas A. Petrick
