Dear Mr. Fay:

By letters dated March 5, June 26 and June 29, 1984, you requested modification of the dates contained in the staff's July 12, 1983 Confirmatory Order for Modification of License pertaining to installation of certain postaccident monitoring equipment for Point Beach Units 1 and 2 described by N EG-0737 Item II.F.1.

By earlier letter dated February 6, 1984 you requested that staff Confirmatory Orders for Modification of License dated November 20, 1979 and January 3, 1980 be formally rescinded. These Orders impose more restrictive leakage limits on Point Beach Unit 1 steam generators due to severe corrosion problems experienced on those steam generators. As the Point Beach Unit 1 steam generator lower sections including tube bundles have been replaced, you assert that the Orders are no longer needed for continued safe operation of the facility and have asked that these Orders be rescinded.

Because the requested changes would require alteration of current license requirements for Point Beach Units 1 & 2, they should be pursued via the formal license amendment process in accordance with 10 CFR 50.90 and other applicable regulations.

Sincerely,

Original signed by:

James R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing

Dear Mr. Fay:

By letters dated March 5, June 26 and June 29, 1984, you requested modification of the dates contained in the staff's July 12, 1983 Confirmatory Order for Modification of License pertaining to installation of certain postaccident monitoring equipment for Point Beach Units 1 and 2 described by NUREG-0737 Item II.F.1.

By earlier letter dated February 6, 1984 you requested that staff Confirmatory Orders for Modification of License dated November 20, 1979 and January 3, 1980 be formally rescinded. These Orders impose more restrictive leakage limits on Point Beach Unit 1 steam generators due to severe corrosion problems experienced on those steam generators. As the Point Beach Unit 1 steam generator lower sections including tube bundles have been replaced, you assert that the Orders are no longer needed for continued safe operation of the facility and have asked that these Orders be rescinded.

It is the staff's opinion that your proposed changes constitute relaxations of your current license requirements for Point Beach Units 1 and 2 and, therefore, should be pursued via the formal license amendment process in accordance with 10 CFR 50.90 and other applicable regulations. We apologize for any inconvenience this may cause you.

Sincerely,

James R. Miller, Chief
