Vice President

Philadelphia, PA 19101

Gentlemen:

Subject: Limerick Generating Station, NRC Emergency Preparedness Appraisal  
Report 50-352/84-18

This refers to your letter dated October 22, 1984, requesting that the commitment date on completion of certain items associated with the Technical Support Center (50-352/84-18-14) be revised from fuel load to initial criticality.

Based on our reviews of the alternate means of communication available in the control room and the Technical Support Center Ventilation System, we have concluded that there would be no significant impact on the health and safety of the public as a result of deferring completion of these items until initial criticality. We concur in the proposed change of commitment dates.

Sincerely,

Original Signed By  
Thomas T. Martin
