IN RESPONSE REFER
TO FOIA-84-329

Dear Mr. Sholly:

This is in further response to your letter dated April 30, 1984, in which you requested, pursuant to the Freedom of Information Act (FOIA), a copy of the following document:

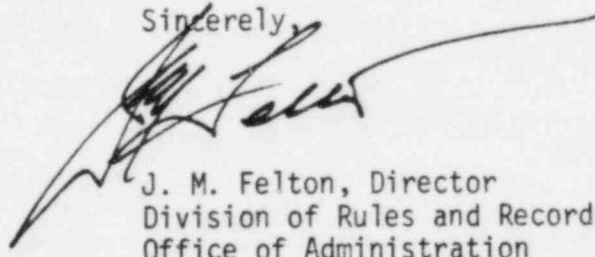

NUREG/CR-3301 - "A Catalog of PRA Dominant Accident Sequence Information,"
by N. G. Cathy, et al., EG&G - 2259, EG&G Idaho, Inc., June 1983

By letter dated June 5, 1984, we released those portions of the requested document which pertain to 11 plants and denied that portion (Appendix M) which pertains to the Limerick plant. At this time, we are placing Appendix M pages M-1 through M-29 in their entirety (List of Tables in Appendix M) and portions of pages M-30 through M-63 (Table M-1.0) in the NRC Public Document Room in file folder FOIA-84-329.

The General Electric Company (GE) maintains that release of the deleted information on Table M-1.0 (pages M-64 through M-141) and all of the information on Tables M-2.1 through M-5.4 (pages M-30 through M-63) could cause substantial harm to the competitive position of GE. Among other things, the analyses were developed with the expenditure of substantial GE resources and public availability of the information would deprive GE of the ability to seek reimbursement for its use by utility customers. The NRC has reviewed GE's proprietary claim and agrees that the information involved is proprietary and should continue to be withheld from disclosure.

This completes NRC's action on your request.

Sincerely,

J. M. Felton, Director
Division of Rules and Records
Office of Administration

FREEDOM OF INFORMATION
ACT REQUEST

FOIA-84-329
rec'd 05/01/84

RE: Freedom of Information Act request for NUREG/CR-3301,
"A Catalog of PRA Dominant Accident Sequence Information",
EG&G Idaho, Inc., June 1983, FIN A6301 (Sholly FOIA
Number 84-26)

Dear Mr. Felton:

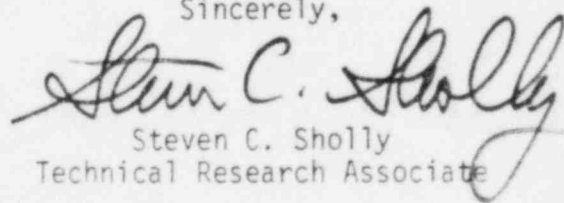

Pursuant to the Freedom of Information Act, please make available
at the Commission's Washington, D.C., Public Document Room a copy of the
following document:

NUREG/CR-3301, N. G. Cathey, et al., "A Catalog of PRA
Dominant Accident Sequence Information", EGG-2259,
EG&G Idaho, Inc., June 1983 (FIN A6301).

It is my understanding that there may be a proprietary claim regarding
certain portions of the report concerning the PRA results for the Limerick
BWR. It is difficult in the abstract to conceive of how information
contained in a PRA could be considered to be proprietary. In any event,
I am requesting that the entire report be publicly released. I would
appreciate that any questions regarding possible proprietary claims not
delay the release of the remainder of the report, and that any such
claims be reviewed for their continued applicability on a separate track
from the remainder of the report.

Your cooperation in responding to this request is appreciated. If
there are any questions, please do not hesitate to contact me at 296-5600.

Sincerely,

Steven C. Sholly
Technical Research Associate
