October 26, 1984

In Reply Refer To:
Docket 50-267

Mr. O. R. Lee, Vice President
Electric Production
Public Service Company of Colorado
P.O. Box 840
Denver, Colorado 80201

Dear Mr. Lee:

SUBJECT: FORT ST. VRAIN NUCLEAR GENERATING STATION, AMENDMENT NO. 44
TO FACILITY OPERATING LICENSE DPR-34

The Commission has issued the enclosed Amendment No. 44 to Facility Operating License DPR-34 for the Fort St. Vrain Nuclear Generating Station in response to your application for amendment dated May 10, 1984 (P-84136).

The amendment revises the Technical Specifications related to the sampling and analysis frequency for determining the radioactivity of the secondary coolant system. Daily sampling is now required when the activity increases to 10% of the limit instead of the previously imposed 25% limit while daily sampling is no longer required on activity level increases by a factor of 25% over the equilibrium value at a given power level.

A copy of the Safety Evaluation supporting this amendment is also enclosed. The notice of issuance will be included in the Commission's next monthly Federal Register notice.

Sincerely,

Original Signed By
Philip C. Wagner

Philip C. Wagner, Project Manager
Reactor Project Branch 1

Enclosures:

1. Amendment No. 44 to DPR-34
2. Safety Evaluation
