Dear Mr. Denton:

Pursuant to 10 CFR 50.59, Commonwealth Edison proposes to amend Appendix A, Technical Specification, to Facility Operating Licenses NPF-11 and NPF-18. These amendment changes are being submitted for your staff's review and approval.

The proposed changes cover two general areas. Technical Specification reporting requirements are revised to conform to 10 CFR 50.73 requirements. These changes are contained in Attachment C and are requested to become effective upon approval. Attachment F contains requested changes which delete channel check requirements from certain instruments. These changes are necessitated by the upcoming replacement of instrumentation which has local readout capability with blind instrumentation which complies with the requirements of 10 CFR 50.49. If approved, these changes should become effective November 30, 1985. Reference (d) contains additional information on this topic.

Both the proposed changes have received On-site and Off-site review and approval. We have reviewed these changes and find that no significant hazards considerations exist. Our review is documented in Attachments D and G, respectively. Commonwealth Edison is notifying the State of Illinois of our request for these amendments by transmitting a copy of this letter and its attachments to the designated State Official.

In accordance with 10 CFR 170, a fee remittance of \$150.00 is enclosed.

Please direct any questions you may have concerning this matter to this office.

Three (3) signed originals and thirty-seven (37) copies of this transmittal and its attachments are provided for your use.

Very truly yours,

J. G. Marshall
Nuclear Licensing Administrator
