Re: Docket #50-602

Dear Sir:

The enclosed pages are provided in response to questions regarding The University of Texas Emergency Plan submitted November 9, 1984.

The page labeled Figure 1.0 is provided as the referenced block diagram in Section 2.0 page 8 of the plan. This figure was inadvertently omitted from the initial submittal.

The page labeled "A4" is submitted as the titles of Emergency procedures and guidance documents to be written in support of maintaining emergency preparedness. These documents are to be prepared when sufficient details of the new facility are available for an accurate preparation of the procedures. Similiar procedures have been prepared for the Emergency Plan applied to the current facility license R-92.

Agreement letters are not provided with the plan. Efforts to obtain letters of agreement are not considered appropriate for a proposed facility that is not to be functional for nearly two (2) years. Ample time exists to obtain letters before the facility is functional and without unnecessary confusion to off-site response groups about the facility status.

Page Two

The NETL program currently maintains several agreement letters as part of its current R-92 license Emergency Plan and is confident that similar agreements will be obtained appropriately for the new facility. Letters to be obtained are:

City of Austin Fire Department,
City of Austin Emergency Medical Service,
City of Austin Brackenridge Hospital.

Sincerely,

Thomas L. Bauer
