 - 3) BECo Letter No. 84-146, dated September 11, 1984, Harrington to Denton, "Response to IGSCC Inspection Order Confirming Shutdown"

Dear Sir:

This letter is being submitted in response to IE Bulletin 83-02 (Reference 1) which directed Boston Edison Company (BECO) to perform ISI of large diameter stainless steel recirculation system piping and submit the results and corrective actions to the NRC. The IGSCC Inspection Order confirming shutdown (Reference 2) required that a report be submitted to the NRC of the results of mandated inspections and corrective actions taken at Pilgrim Nuclear Power Station. By Reference 3, BECo has submitted a report to the NRC documenting the results of ISI and corrective actions taken at PNPS. This previously submitted report addresses the response to all applicable items of IE Bulletin 83-02. Therefore, no additional information will be submitted in response to Bulletin 83-02.
