Mr. A. E. Lundvall, Jr.  
Vice President - Supply  
Baltimore Gas & Electric Company  
P. O. Box 1475  
Baltimore, Maryland 21203

Dear Mr. Lundvall:

We have reviewed your letter of August 27, 1984 which requested a one-year extension of the operability date for the Unit 2 Safety Parameter Display System (SPDS) from October 1, 1986 to October 1, 1987. The commitment date for the Unit 2 SPDS was incorporated in our Confirmatory Order dated June 14, 1984.

Based upon our review of your August 27, 1984 letter, we conclude that the need for the requested extension is not obvious at this time. Specifically, if installation of the Unit 2 SPDS can be completed during the Fall 1985 Unit 2 refueling outage, an SPDS operational date of October 1, 1986 can be achieved. We request, therefore, that you make every possible effort to complete installation of the Unit 2 SPDS during the Fall 1985 refueling outage. Should this not be possible, please so inform us following the Fall 1985 refueling outage and include a description of the measures which you had taken to expedite installation of the SPDS.

We would be pleased to review your request for an extension at that time.

Sincerely,

Original signed by:

James R. Miller, Chief  
Operating Reactors Branch #3  
Division of Licensing
