Ms. Yvonne Stewart
National Register of Historic Places
National Park Service
U.S. Department of the Interior
Washington, D.C. 20240

Dear Ms. Stewart:

Pursuant to our responsibility under 36CFR63 as licensing agency for the operation of Braidwood Station, Units 1 and 2, the Nuclear Regulatory Commission recently requested a determination by your office of the eligibility of site 11KA179 for inclusion in the National Register of Historic Places.

Enclosed is the U.S. Geological Survey map which you requested of me in a telephone conversation on October 19, 1984. The site is indicated on the map together with the other locational information you requested. The map was prepared by Mr. Michael D. Wiant, archeologist with the Illinois State Museum. Should you require any clarification of the enclosed information, please contact Mr. Wiant on (217)-785-0134 or myself on (301)492-7040.

Sincerely,

B. Joe Youngblood
B. Joe Youngblood, Chief
