Gentlemen:

SUBJECT: SYSTEMATIC ASSESSMENT OF LICENSEE PERFORMANCE *50-395-84-22*

The Nuclear Regulatory Commission has completed its periodic evaluation of the performance of your reactor facility. As you are aware, this evaluation program, the Systematic Assessment of Licensee Performance (SALP), involved an assessment of facility performance by the NRC staff; the issuance of the staff's findings in the form of a final report, the SALP Board Assessment; your response to the SALP Board Assessment (enclosed); and the review of your comments and characterization of the overall performance of your facility.

It is our view that the South Carolina Electric and Gas Company's conduct of nuclear activities at the V. C. Summer facility has shown a proper concern for nuclear safety. Major strengths were identified in the areas of radiological controls, maintenance, emergency preparedness, and security and safeguards. No major weaknesses were identified.

No reply to this letter is required; however, should you have any questions concerning these matters, I will be pleased to discuss them with you.

Sincerely,

James P. O'Reilly  
Regional Administrator
