Gentlemen:

We have received a copy of your application dated October 10, 1984, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application informed the NRC of your intention to use the alternate method for collection and storage of eddy current test data described in ASME Section XI Code Case N-401 for the Beaver Valley Power Station Unit No. 1. Fees pursuant to 10 CFR 170 were not remitted with your application.

Since your application was filed after the June 20, 1984 effective date of the revision to 10 CFR 170 on fees, it is subject to the provision of the revised rule. This rule requires licensees to remit an application fee of \$150 with each application for license amendment, relief, exemption and other request. Therefore, it is requested that your Company remit the required application fee of \$150 for your October 10 request.

Sincerely,
