 Technical Staff Manager

Gentlemen:

By letter dated September 19, 1984, the Division of Licensing (DL) staff informed your company of their approval of your application dated April 27, 1983, and issued Amendment No. 87 to Facility Operating License No. DPR-46 for the Cooper Nuclear Station. This application requested Technical Specification changes to incorporate certain NUREG-0737 items. A Class II fee (\$1,200) was remitted with your application pursuant to 10 CFR 170.22 of the March 23, 1978 regulations.

Based on information provided by the DL staff as the result of their final review of your application, it has been determined that two Class III fees (\$8,000) are appropriate since the review involved consideration of two safety issues. Therefore, your company is requested to remit the additional sum of \$6,800 to this office.

Sincerely,
