IN RESPONSE REFER
TO FOIA-84-676

Dear Ms. Varricchio:

This is in response to your undated letter, which was received in this office August 14, 1984, in which you requested, pursuant to the Freedom of Information Act (FOIA), three separate categories of documents relating to the Wolf Creek Nuclear Power Plant.

Appendix A is a list of 25 documents relating to your request. Documents two through 25 are being placed in the NRC Public Document Room (PDR) in file folder FOIA-84-676. Access to document one may be acquired by referencing the accession number listed by the document. Other documents relating to your request have previously been placed at the PDR under docket 70-2960.

At your request, we forwarded your letter to the NRC's Office of Resource Management and were informed by staff of that office that they found no records subject to your request.

In addition to the documents listed on Appendix A, there are two oversized drawings (approximately 4 x 5 feet in size) which have not as yet been reproduced. These two drawings are described below:

1. July 20, 1984 - Kansas Gas & Electric Hot Functional Testing Sequence Chart, Rev. IV, and
2. August 10, 1984 - Kansas Gas & Electric Composite Test Schedule to Fuel Load, Rev. III.

Should you wish copies of these drawings, please contact Nina Toms at 492-8993 to discuss the costs which would be involved to have them reproduced.

The staff stated that the licensee's information shown on these large drawings is contained throughout the other documents which we are placing in the PDR.

This completes NRC's action on your request.

Sincerely,

A handwritten signature in cursive script, appearing to read "John Philippe Felton".
