

NOV 9 1984

Docket No. 50-346

Toledo Edison Company  
ATTN: Mr. Richard P. Crouse  
Vice President  
Nuclear  
Edison Plaza  
300 Madison Avenue  
Toledo, OH 43652

Gentlemen:

We have completed our review of the change to your Nuclear Quality Assurance Program (NQAP) submitted with your letter of October 12, 1984. This change represented a reduction in commitments regarding the storage of calibration records in fire rated cabinets.

Based on our review, we have concluded that the change forwarded with your October 12, 1984 letter is an acceptable reduction in commitments and is therefore approved for implementation. This approval for implementation is limited to this particular change. Our review of the additional changes to Revision 2 of your NQAP forwarded with your letter of June 29, 1984 is in process. We will advise you on the results of that review when it is completed.

Please contact Mr. F. Hawkins of my staff (312-790-5555) with any questions you have regarding this matter.

Sincerely,

"Original signed by R.L. Spessard"

R. L. Spessard, Director  
Division of Reactor Safety
