Mr. Robert D. Martin, Regional Administrator
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection & Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Dear Mr. Martin:

River Bend Station Unit 1
Docket No. 50-458
Final Report/DR-265

GSU has completed its evaluation of DR-265 concerning shielded cables in excitation cabinets of the standby diesel generators supplied by Transamerica Delaval, Incorporated. RTE Delta Company has not completed its testing of the cable; however, since the defective cable is internal to the RTE delta equipment and it was neither installed nor terminated by site personnel, GSU believes that the deficiency could not be the result of actions taken at the site.

Sincerely,

William J. Booker
