C. Trammell

Dear Mr. Andrews:

On May 8, 1980, the Commission issued IE Bulletin No. 80-11 requesting all operating license holders to respond to our concerns related to the structural integrity of concrete masonry walls. We have completed our review of your responses concerning the concrete masonry wall design at the Fort Calhoun Station, Unit No. 1. Based upon our review and the evaluation by our consultant, Franklin Research Center (FRC), we conclude that your responses and wall modifications completed and planned are acceptable.

It is our understanding that the remaining wall modifications will be completed this calendar year. This schedule is also acceptable.

A copy of our Safety Evaluation with the attached FRC Technical Evaluation Report C5506-258 is enclosed for your information. This completes our review of this matter for your facility.

Sincerely,

James R. Miller, Chief  
Operating Reactors Branch #3  
Division of Licensing

Enclosure:  
Safety Evaluation with  
attached FRC Technical  
Evaluation Report
