In the Matter of
Philadelphia Electric Company
(Limerick Generating Station, Units 1 and 2)
Docket Nos. 50-352 and 50-353 OL

Dear Board Members:

Enclosed are copies of letters dated November 6 and December 4, 1984 from Philadelphia Electric Company to the Pennsylvania Bureau of Corrections. These letters were given to Mr. Love, counsel for the Graterford Inmates, at the conference held on February 27, 1985 in Harrisburg, Pennsylvania.

Sincerely,

Mark J. Wetterhahn
Counsel for Applicant

November 6, 1984

Mr. L. P. Benning, Chief
Security/Safety
Pennsylvania Bureau of Correction
P. O. Box 598
Camp Hill, PA 17011

Dear Mr. Benning:

In October at a meeting I attended with you and your associates at the Pennsylvania Bureau of Correction as well as with John Patten and Ralph Hippert of PEMA, you proposed the training program and list of equipment developed by the Bureau of Correction for the radiological emergency response plan of the Graterford Prison. Since that date, we have had discussions with you relative to various aspects of your requested program.

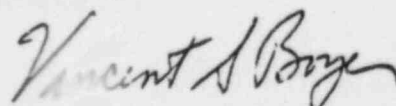

With regard to the training plans, we understand that PEMA will either conduct or review the program to assure that the training material is adequate for the intended purpose. Philadelphia Electric Company agrees to reimburse the Bureau of Correction for incremental costs associated with the training program beyond that provided by the State of Pennsylvania under Act 147, the Pennsylvania Radiation Protection Act. We expect that training will be accomplished as part of the normal work week in so far as possible. Invoices for the incremental training costs may be directed to my attention.

We have reviewed the equipment listed in the Pennsylvania Bureau of Correction equipment cost projection and find the quantity and type of equipment listed to be reasonable for the purposes intended. We plan on initiating the purchase orders for hardware and having it delivered to your attention.

Items 6, 7 and 8 of the equipment list covers the furnishing of radios and associated equipment. We intend to purchase and furnish this equipment to you, but as I discussed with you on the phone, we are formulating a proposal which, while making the equipment available to you when needed, will enable it to be utilized rather than gathering dust in a storage cabinet.

We are pleased to work with you in the finalization of the emergency planning needs for the Graterford Prison.

Sincerely,

PHILADELPHIA ELECTRIC COMPANY

December 4, 1984

Mr. L. P. Benning, Chief
Security/Safety
Pennsylvania Bureau of Correction
P. O. Box 598
Camp Hill, PA 17011

Dear Mr. Benning:

I appreciate your letter of November 27 relating to the training and equipment needs of the Pennsylvania Bureau of Correction which Philadelphia Electric Company will provide in connection with the emergency plans for the Graterford Prison.

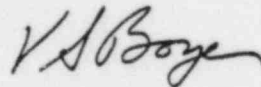

I believe my letter of November 6, together with the statements in your November 27 letter, confirm our agreements with regard to the conduct and expenses associated with the training program.

We are proceeding to issue requisitions for furnishing you the equipment items covered in the list which you prepared. With regard to items 6, 7, and 8, our investigation has not disclosed a method which we believe would be satisfactory to you, and at the same time result in significant reduction in cost to us. We will, therefore, furnish you the equipment as listed for your storage and use. Should the industry work which is currently being carried out result in an eventual reduction in the emergency planning zone requirements and negate the need for evacuation of the Graterford prisoners, we would expect that the mobile radio equipment would be returned to us. We do not expect such an event to occur within the next year or so, but I do believe that work with regard to the safety aspects and fission product release from nuclear facilities could eventually justify a reduction in the offsite emergency planning requirements.

Mr. Tepper of our Electrical Engineering Division will be issuing the purchase order for the radio equipment and Mr. Deneen of our Security Division will be coordinating the ordering and delivery of the hardware items. Please feel free to contact myself or either of these gentlemen if you have any questions with regard to these items.

We are currently undergoing NRC hearings on the offsite emergency planning issues. To obtain final approval for our full power license, PEMA and FEMA may suggest that a tabletop exercise be conducted to test the Graterford plan. We would certainly appreciate your cooperation in this area. Please keep us informed of any problems which may arise with regard to the satisfactory resolution of the Graterford Prison emergency plan approval.

sincerely,

cc: G. D. Tepper
R. J. Deneen
J. L. Patten, PEMA
