Mr. H. R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Crystal River Unit 3  
Docket No. 50-302  
Operating License No. DPR-72  
Technical Specification Change Request No. 82

Dear Sir:

Attached are two pages from BAW-1575, "Crystal River Unit 3 - Cycle 5 Reload Report", which were inadvertently omitted from Technical Specification Change Request No. 82, Attachment A, and CR-3 Operating License Amendment 64. The Safety Evaluation Report for Amendment 64 appropriately addressed this restriction on Axial Power Shaping Rod (APSR) position. Crystal River Unit 3 will continue to operate within the referenced restraints (APSR's fully withdrawn) for the duration of Cycle 5.

Sincerely,

G. R. Westafer  
Manager, Nuclear Operations  
Licensing and Fuel Management
