ID#5

L.I.  
Shurehan

The Honorable Norman F. Lent  
U. S. House of Representatives  
Washington, D. C. 20515

Dear Congressman Lent:

This replies to your September 27 letter enclosing a copy of Mr. Herbert Jaffe's September 15 letter to you. The Nuclear Regulatory Commission's "requirements and testing procedures...for the diesel generators for emergency power at Lilco's Shoreham nuclear power plant..." are set forth in the Office of Nuclear Reactor Regulation's Standard Review Plan--specifically chapters eight and nine. Copies of the Standard Review Plan are on file in the Public Document Room; however, in order to be more responsive to Mr. Jaffe's request, I am enclosing copies of those two chapters with this letter. If you need additional information, please let me know.

Sincerely,

Frank Ingram  
Assistant to the Director  
Office of Public Affairs
