## General Comment

The NRC and DHS should not allow for foreign nationals, who are not verified, to have any access to the United States. It clearly states, "licensees shall take responsible steps to access reliable, independent sources of information in addition to the information provided by the applicant, to verify the applicant's claimed non-immigration statuses." If the 'licensees' do not take these proper steps, it allows for non-verified workers, who are foreign nationalist and not claiming to be immigrants, that do not claim immigration statuses to be in the United States and work. They are allowing for these non-verified foreign nationalist to use visas to work at the nuclear plants that are not even meant for (1) foreign nationalist the right to work, and (2) they are using the system illegally. DHS and the NRC need to realize this can cause for some people to enter into the country and handle some of the most reactive materials in the world while being unchecked. If they are not verified than they should not be allowed to work in the US.
